Career Objective:

Student of Computer Science with working across the Java Software Development. Looking for a role where I can learn and grow from experienced team members while drawing on Project experience I have already successfully executed.

Projects:

Automatic Job Apply Application

The Automatic Job Apply application functions as a bot, automatically applying for all jobs and internships available on various platforms (LinkedIn, Glassdoor, Indeed, etc.) according to your CV/resume.

Event Planning Application

An Event Planning Application built using React, Node, MongoDB, and Express enables users to seamlessly create, manage, and track events. It offers features like event scheduling, attendee management, and real-time updates, ensuring an efficient and user-friendly event planning experience.

Inventory Management App

An Inventory Management App built with the MERN stack streamlines inventory tracking and management. It features real-time updates, order management, providing an efficient and user-friendly solution for businesses to manage their inventory operations seamlessly.

E-Commerce App with finlet digital wallet

An E-Commerce app integrated with Finlet wallet, developed, provides a comprehensive online shopping experience with secure digital wallet payments, real-time inventory updates, and efficient order management for a seamless and user-friendly experience.

Certification/Achievements

- Certificate of Completion of **'Data Structure & Algorithms'** by Apna College.

- Certificate of Completion of **'Web Development using MERN Stack'** by Apna College.
